DAY ROOM & SPA

A package designed for total relaxation, to be lived in complete calm enjoying the benefits of the wellness center combined to the intimate relaxation in the privacy of a hotel room.

Suggested path

the road
to wellness

It starts with the Kneipp path passing through a circuit with special nozzles that deliver water at different temperatures and at a pressure that helps the oxygenation of the lower limbs

The next step is the wonderful sensation of the emotional showers, where you can enjoy the water massage on your back, while the nebulized particles from the showers associated with chromotherapy and aromatherapy, help to soothe anxiety and stress.

In the steam bath, a cloud of steam completely envelops your body. The temperature reaches 43 centigrade with 100% humidity, allowing the epidermis to eliminate impurities, favoring greater luminosity, elasticity and softness.

The sauna reaches a temperature of 85 centigrade of dry heat. As the body adapts to the heat, the blood that flows to the heart and the skeletal muscle system increases, with greater efficiency in transporting oxygen to the muscles.

Halotherapy

The salt cave is a room with walls covered of clean, dry salt. Inside it is possible to inhale the salt particles with the help of a technology that ionizes and nebulizes them in the environment. Salt has mucolytic, anti-bacteriological, anti-inflammatory properties and acts as a natural remedy for some respiratory disorders.

The hydromassage pool is recommended at the end of the wellness path and combines the benefits of hydrotherapy together with those of massotherapy. Water pressure favors the drainage of liquids; the temperature of 34 centigrade has decontracting power and stimulates the circulation causing a natural energizing massage on our body.

The infrared sauna combines the benefits of a traditional sauna with that of natural sunlight. It allows the relaxation and expulsion of excess toxins, improves blood circulation and the immune system, relieves pain and helps the slimming process, reducing excess moisture, salt and subcutaneous fat. The epidermis of the whole body benefits greatly and this sauna helps prevent the formation of varicose veins. The cabin is equipped with a chromotherapy and music system.

The benefits of time spent in our Rosa Purpurea Wellness Center give your body and mind a result of total natural well-being.

OPHURO

THE BATHROOM
in the Japanese wooden tub

The Ophuro is a Japanese ritual, a relaxing and rejuvenating bath in a Hinoki wooden tub. Recommended in the evening to ease the tensions of the day, or in the morning to promote a totally relaxing awakening and improve mood due to the effect of serotonin.

This treatment is traditionally preceded by a shower to purify the body and remove impurities from the skin.

45 minutes of hot bath can increase your well-being and psycho-physical balance, helping you to prevent and fight states of anxiety, stress, muscle problems and cardio-circulatory system alterations.

Bath salts dissolved in the water have numerous soothing and beneficial properties for your body and mind. Bathing with salts helps cleanse your body, eliminating toxins and potentially harmful substances, stimulating the production of serotonin, the so-called “good mood hormone” and allowing your body to relax.

La Rosa Purpurea
(Hermann Hesse)

*Ti avevo cantato una canzone.
Tu tacevi. La tua destra tendeva
con dita stanche una grande,
rossa, matura rosa purpurea.*

*E sopra di noi con estraneo fulgore
si alzò la mite notte d'estate,
aperta nel suo meraviglioso splendore,
la prima notte che noi godemmo.*

*Sali e piegò il braccio oscuro
intorno a noi ed era così calma e calda.
E dal tuo grembo silenziosa scrollasti
i petali di una rosa purpurea.*
